

It is the policy of the Board of Trustees to discourage the giving of gifts by employees or students to supervisors, teachers, or administrators, particularly during the holiday seasons.

The trustees encourage employees and students who desire to express their appreciation to supervisors, teachers, or administrators to do so by writing a personal letter to the individual, rather than presenting a gift, regardless of its monetary value.

The Board of Trustees and individual members of the Board of Trustees may not accept any personal gift from any source but may accept gifts from individuals or organizations when such gifts are presented to the school district through the Board of Trustees and are intended for use in the district schools.
